the encryption/decoding function with the secrete key and the
encryption/decoding function with the secure key, and the keyboard
manager with application program interface is included.

19.   (New) A computer secure system comprising the secure
adapter, the keyboard and the computer system according to Claim 6,
where a separate secure key for entering secure mode setup/clearing
command is incorporated in said keyboard and/or the secure mode
setup/clearing command can be created by the combination of existing
key codes, the computer system has the secure key creation function,
the encryption/decoding function with the secrete key and the
encryption/decoding function with the secure key, and the keyboard
manager with application program interface is included.

REMARKS

This Preliminary Amendment amends Claims 5 and 7 so that these
claims are no longer multiply dependent. New claims 12-19 have been
added to provide similar coverage. The Applicant may elect to amend
Claims 5 and 7 to make them again multiply dependent or to add
additional claims to this application to provide coverage similar
to, broader than, or narrower than the present claims at any time
during the pendency of the above-identified U.S. application.

Respectfully submitted,

Mavis S. Gallenson
